Privacy Curtain

A privacy curtain is a type of curtain or partition used to create a private space or to block the view from outside. It is commonly used in various settings such as funeral homes hospitals,

Coldroom Curtain System

Convert any area into a coldroom with insulated mortuary curtain systems & coolers.

Manufactured in the UK and designed to your room requirements.

Ideal for separating areas such as a garage or large chapel our curtains are fitted with a ceiling rail as well as ceiling insulation and have a Velcro edge strip for easy opening and closing.

For greater insulation our curtains can also be used against walls and ceilings to prevent moisture build up.

For a free no obligation quotation, just call us.. 01283 819922

Gantry Hoist

Gantry Hoist

Our gantry hoist provides a unique and innovative method of body transfer. Our 2 strap design has no obstructive spreader bar which offers a safe and dignified transfer with minimal contact between the body and the user. The 2 strap design offers fantastic stability during the transfer with a smooth and soft function that creates a gentler positioning of the body.

The necessary ceiling tracking is also available for these products, with a track system that completes the versatility of the Ceiling Hoist. There are various different kinds of tracking available to suit different environments. We offer room to room transfer tracks, wall support, track switches and wall brackets. For more information on this product and the differences in tracking please contact us or visit our website.

Funeral home and mortuary upgrades and refurbishment

First Call Fold Away Stretcher

The Fold Away Stretcher is a duo-fold design, allowing a normally bulky item to require minimum storage space when not in use. The stretcher folds both horizontally and vertically into the compact dimensions shown below. The frame, manufactured from aluminium, is both strong yet lightweight. The stretcher bed is produced from a tough PVA material that is resistant to fluid and is extremely easy to clean.

Once locked open, the frame ensures the deceased are kept clear of the ground.

Complete with fully zipped carry bag and straps.

EQUIPMENT
LEASING

Dimensions

Open 204cm x 71cm
Folded 88cm x 24cm

Scoop Stretcher

A tried and trusted design, used as a staple item by Emergency Services and Rescue Organisations for many years. Its main function is to transport the injured & deceased safely. Instead of a flat, plain bed, the stretcher incorporates a frame of hinged panels. In their unlocked position, each panel is capable of being swivelled, (rather like a cellar trapdoor). Without disturbance to the body's position, the stretcher can be manoeuvred in such a way that allows each of these panels or flaps to slide underneath the body. Once in its final position, all the plates are locked into place and the deceased can be safely moved. Instead of being lifted onto a traditional stretcher. One vital feature is the way the stretcher maximises patient immobilisation during transit.

Dimensions

Open 6cm x 44cm x 190cm
Closed 6cm x 44cm x 120cm

Fold Away Mortuary Wash Table

This collapsible table is designed to offer a solution for easy transportation and/or compact storage.

The fully welded stainless steel fabrication provides a wide stable platform and is designed to give many years of safe and reliable use.

The centre rail is secured with four hand adjustable locking screws, forming a rigid platform which also serves to secure the hinged legs in place when collapsed.

Built with a standard working height of 900mm and an inbuilt decline of 40mm for drainage. There is some scope in manufacture to adapt these to suit your own dimensions or alter the working height.

Ask about our leasing plan

Mortuary Wash Table

The Mortuary Wash Table is made to a very high standard and is specifically designed so that families or mortuary staff can wash the deceased in a professional manner and in keeping with religious beliefs. A single drainage hole with pipe ensures that used water flows easily away into a drain. This Wash Table is available in bariatric sizes and with folding legs if required. This complements our folding or fixed dressing table.

Roll on, Roll off Mortuary Wash Table

New to our range is the Roll on Roll off Mortuary Table. This stainless steel table was designed bespoke to suit the requirements of an embalmer and is proving popular for both preparation and wash/dress.

- * Table feature incline to improve drainage
- * Dimensions can be tailored to your requirements
- * Table is fitted with castors for ease of maneuverability and storage
- * Designed to work with our Dual Height Sink & Sluice
- * Stainless steel mortuary trays can & slats can also be supplied

Multilevel AT200

The Multilevel AT200 has been designed and manufactured to travel easily over cobbles, gravel, uneven surfaces, door thresholds and grass! Its large rubber tyres minimise surface vibration. The stretcher can be moved between height positions without assuming the full weight. The multilevel facility allows body transfers without lifting and when folded flat, fits into the same space as a conventional trolley.

**** All Terrain **
Stretcher**

Length: 76" / 193cm

Multilevel Stretcher

The Multilevel Stretcher allows a removal operation to be conducted professionally and safely. The stretcher can be moved between height positions without assuming the full weight.

The Multilevel Stretcher also benefits from the Roll in Roll out system allowing it to fit into very small nursing home and lifts to an upended position without the operator having to take the weight.

The multilevel facility allows body transfers without lifting which reduces the risk of operator injury.

Length: 76in / 193cm
Loading Wheel Width: 23in / 58cm

Multilevel XL300

The Multilevel XL300 has been designed to carry out safe and dignified removal of larger bodies. The XL300 offers independent leg operation. The fold down locking sides* greatly increase surface area allowing body mass to be contained. This trolley can also be fitted with an easy-out system which eliminates the need to lift when exiting your vehicle.

The XL300 also benefits from the Roll in Roll out system allowing it to fit into very small nursing home lifts in an upended position without the operator having to take the weight.

Length: 76in / 193cm
 Loading Wheel Width: 23in / 58cm
 Max Width - Arm-sides Out: 35in / 89cm
 Height - Mattress: 30in / 78cm

Service & Maintenance

Rose House are proud to offer a comprehensive range of maintenance options to support your business. All of our equipment is installed with a minimum 12 month warranty. However we also understand that even the best equipment will at times require attention. Therefore we provide a comprehensive service to ensure your equipment remains at its best and receives priority attention.

National Coverage

We work with a highly experienced and skilled team of engineers who cover the length and breadth of the UK. All calls are managed as a priority with a six hour service available for the most critical of issues. In every case we will always keep you informed of expected attendance times and the works required. We understand how important it is to ensure your cold storage is working effectively and accordingly we will always endeavour to ensure efficient and comprehensive service.

Planned Preventative Maintenance (PPM)

We are able to arrange an annual site visit to inspect all of your equipment and take any necessary action to ensure your cold storage is at its best. Small maintenance tasks will also be included within this inspection free of charge. Furthermore subscribing to our PPM schedule allows you a 10% discount on call outs in the unlikely event of a problem.

As we all know prevention is better than cure.

Reactive Maintenance

As with any equipment it is inevitable that breakdowns will on occasions occur. Our engineers carry a supply of most commonly used parts on their vehicles, therefore many problems can be quickly and efficiently handled. For more complex issues we utilise a priority order system to ensure that any equipment is inoperable for the minimum possible time. We will also keep you informed throughout the process.
